## Definitions of Terms Used

### Employment Categories

The following employment categories for higher education institutions are used in EEO reporting to federal and state agencies.

**Officials and Managers:** Occupations in which employees set broad policies, exercise overall responsibility for execution of these policies, or direct individual units or program areas of operation.

**Professional:** Occupations which require four years or more of college, experience, or comparable background. Jobs in this category do not include occupations whose primary task is instruction.

**Clerical:** Occupations in which employees perform tasks associated with clerical or secretarial activities, including internal and/or external communication, recording and retrieval of data or other paper work required in an office.

**Technical:** Occupations which require a combination of basic scientific or technical knowledge and manual skills which can be obtained through on the job training or past high school education, typically equivalent to two years at a community college.

**Service/Maintenance:** Occupations in which workers perform duties which result in or contribute to the comfort, convenience, hygiene or safety of the general public or which contribute to the upkeep and care of buildings, facilities, grounds, or property.

**Skilled Trades:** Occupations that typically require a relatively high level of manual skill and thorough and comprehensive knowledge of the processes involved in the work. Usually require extensive apprenticeship, on-the-job, or other training.

An extensive review of administrative-professional job groups determined that 131 job titles should be moved from the officials and managers category to the professional category, effective for the 2002-2003 reporting period. These changes were made in accordance with the clarified definition from the Department of Education directing the Integrated Post Secondary Education Data System (IPEDS) reporting.
